

International Symposium on Integrated Uncertainty in Knowledge Modelling and Decision Making  
(IUKM 2016) - <http://www.jaist.ac.jp/IUKM/IUKM2016/>

## SPECIAL SESSION:

### **UNCERTAINTY MANAGEMENT IN PREDICTIVE AND RELIABLE MODELING OF BIO-SYSTEMS**

#### **Topics:**

This special session aims at presenting the cutting-edge uncertainty management and methodological approaches for the predictive modeling of bio-systems (biological system, bio-mimic system, and bio-inspired system).

This session covers a large range of studies related to the two main topics as follows:

- Modeling of data uncertainty in development and assessment of complex bio-systems
- Computational algorithms/models for the design and optimization of novel bio-systems

#### **Important Dates:**

- 20 June, 2016: Paper submission
- 25 August, 2016: Notification of acceptance/rejection
- 15 September, 2016: Final version and author registration due
- 10 October, 2016: Early (non-author) registration due
- 30 November - 2 December, 2016: Conference

**Submission:** The proceedings of IUKM 2016 will be published by Springer-Verlag. Papers should not exceed 12 pages in this format. Papers must be submitted electronically through IUKM 2016's submission page at EasyChair (<https://easychair.org/conferences/?conf=iukm2016>).

**Organizers:** Biomechanics and Bioengineering laboratory – University of Technology of Compiègne, France
