JAIST Symposium on Advanced Science and Technology

Hello! My name is Duc. I am from Uehara Lab, School of Information Science, JAIST.

## JAIST Symposium on Advanced Science and Technology

Hello! My name is Duc. I am from Uehara Lab, School of Information Science, JAIST.
Most of you should be familiar with the famous Rubik's cube puzzle.

Figure: Two configurations of the Rubik's cube puzzle. The task is to rotate the sides of the left-hand cube, until it becomes the right-hand cube.

Most of you should be familiar with the famous Rubik's cube puzzle.

Figure: Two configurations of the Rubik's cube puzzle. The task is to rotate the sides of the left-hand cube, until it becomes the right-hand cube.

In computational complexity theory, we study a much more general problem, called the RECONFIGURATION problem.
