## Scope and Background

The organizers cordially invite you to participate in the 6<sup>th</sup> Workshop on Advanced Spectroscopy of Organic Materials for Electronic Applications (ASOMEA), a biannual meeting of Swedish and Japanese scientists convened to advance, through high-energy spectroscopic techniques and theoretical modeling, the understanding of organic electronic materials and related interfaces. Tightly focused presentations and lively discussion in an intimate atmosphere has been the tradition of the ASOMEA workshops, with frank exchange of new ideas and stimulating plenary lectures from renowned invited speakers. There is also a poster session open to all participants. The meeting is jointly organized by groups of active researchers in Japan and Sweden and is open to workers in related fields from both countries.

## Topics

- ◇ *Spectroscopy of Molecules and Thin Films*
- ◇ *Spectroscopy of Organic Semiconductor Surfaces and Interfaces*
- ◇ *Interfaces and Interfacial Phenomena in Organic Electronic Devices*
- ◇ *Charge Carrier Generation and Transport in Organic Materials*
- ◇ *UV and X-ray Photoelectron Spectroscopies*
- ◇ *X-ray Absorption and Emission Spectroscopies*
