

～Traffic safety Guidance ～

「Snow removal system in the city and JAIST Parking」

If accumulation of the snow become 10cm,the staff start to clear away the snow of JAIST Parking lots after city road.

【Department in charge of snow removal】

Road 土木課 (58-2250)

JAIST Parking 管財課 (58-2205)

【CAUTION in winter】

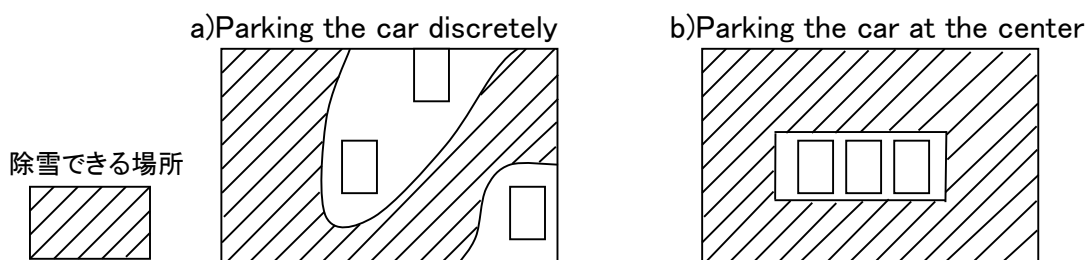

1.it's dangerous to drive a car around a snowplow.You should drive your car apart from it at least 10m.

Removing the snow,

- snowplows move forward and backward over and over again.
- drivers of snowplows cannot find your car approaching because the position of their seat is very high.
- the staff cannot hear the horn you sound,because there is so much noise around the snowplow.

2.Don't park illegally and park on the road,because the staff cannot remove the snow. if they cannot clear away the snow,you have to do it by yourself.

3.we would like you to park the car at the center of the parking lots to remove the snow effectively.

4.Please be sure that you need to prepare snow tires in winter and change them right away.

Please drive carefully and slowly especially on the slopes and rough roads when it snows.

【CAUTION throughout the year】

- You have to put your parking permit beside the windshield in your car.
- You have to park a car in the designated parking lots.
- Those who would like to use parking lots should apply and pay the charge at the Facilities Management Department in advance.
