

ASANO VISION 2020

■Mission

JAIST broadly accepts people with diverse backgrounds from all sections of society, and contributes to creating innovations in education and local community development, by taking advantage of its characteristics as a graduate university, developing global human resources, taking an active role in industry and the world, and pursuing research for the resolution of social issues in a multidisciplinary setting.

■Vision

By 2020, JAIST will establish itself as a needs-oriented research university with its integrated graduate school approach, and create an environment where graduates, with their master's or doctoral degrees and the intellectual toughness they developed at JAIST, will be able to take core active roles in all fields and industries throughout the world.
