Research Data Management and Disclosure Policy of
Japan Advanced Institute of Science and Technology

Ruled By President on December 4, 2023

1. Purpose

Japan Advanced Institute of Science and Technology (hereafter referred to as "JAIST") has the mission of "conducting world-class education and research in a rich academic environment and fostering leaders who will pioneer the world of the next generation through the creation of science and technology" and the goal of "pioneering new fields through diverse basic research and actively returning research results to society".

Under this mission and goal, the appropriate management of diverse research results produced during research activities at JAIST and their utilization through public disclosure and other means will serve as a foundation for ensuring sound and fair research, promoting open science, and contributing to the development of science and technology, the creation of culture, and the promotion of industry.

Considering the above, JAIST has established the "Research Data Management and Disclosure Policy" as the basic policy for managing, disclosing, and utilizing research data at JAIST.

2. Definition of research data

In this policy, "research data" refers to data collected or generated by researchers during their research activities at JAIST, whether digital or non-digital.

3. Management of research data, etc.

The procedures regarding the management, disclosure, and utilization of research data shall be determined by the person who collected or generated the data within the scope of laws and regulations of JAIST, and other equivalent regulations, and without harming the rights and legal interests of other parties.

4. Researchers, etc.

In this policy, "researchers" refers to all persons who conduct research activities at JAIST, faculty, researchers, technical staff, students, and others.

5. Responsibilities of Researchers, etc.

Researchers, etc. shall manage research data appropriately within the scope described in 3. above, and disclose and make it available to the public as much as possible.

6. Responsibilities of University

   JAIST will promote the development of an environment that supports the management, disclosure, and utilization of research data.

7. Other

   JAIST will review this policy from time to time in response to changes in social and academic conditions.
